Please cancel claim 5 without prejudice.

6. (Twice Amended) A machine-readable medium having instructions stored
thereon to implement an electronic commerce World Wide Web page, the sequences of
instructions, when executed by one or more processors, cause one or more electronic
systems to:

provide access to a set of products available for electronic ordering by a user;
monitor products ordered by and shipped to an address associated with the user;
provide, automatically, in response to subsequent accesses by the user a list of
products previously ordered by the user and shipped to the address;
reorder a product in response to the product being selected from the list; and
suggest additional products to the user based on the product selected for reorder.

Please cancel claim 8 without prejudice.

9. (Twice Amended) The machine-readable medium of claim 6 wherein the sequences of instructions that cause the one or more electronic devices to reorder the product further comprise sequences of instructions that, when executed by the one or more processors, cause the one or more electronic systems to:

determine an address to which the product was previously shipped;
verify the address; and
cause the reordered product to be shipped to the address.

Please cancel claim 10 without prejudice.

11. (Twice Amended) An apparatus comprising:
means for providing access to a set of products available for electronic ordering
by a user;
means for monitoring products ordered by and shipped to an address associated
with the user;
means for providing, automatically, in response to subsequent accesses by the
user a list of products previously ordered by the user and shipped to the address;
means for reordering a product in response to the product being selected from the
list; and
means for suggesting additional products to the user based on the product selected
for reorder.
